Here's what might help you: If you are experiencing symptoms of a cold, such as exhaustion, sore throat, and fever, you can take a few things to help alleviate your symptoms and feel better.

Over-the-counter pain relievers such as acetaminophen or ibuprofen can help reduce fever and relieve any body aches or pains you may be experiencing.

If your symptoms persist or worsen, or if you develop new symptoms, it is important to seek medical attention from a healthcare provider.
